TEST SUMMARY REPORT

Project Name: Demo E-Commerce Functional Testing
Tester Name: Khaja Noman Ahmed
Testing Type: Manual Functional Testing
Tools Used: Excel (for Test Cases & Defects)
Application Under Test (AUT): Demo E-commerce Website

Modules Covered:

- Login

- Registration

- Search

- Product Details

- Cart

- Checkout

- Payment

Total Test Cases: 44
Test Cases Passed: 38
Test Cases Failed: 6

Defects Reported: 6

- 2 Critical

- 2 High

- 2 Medium

Test Environment:

- Browser: Google Chrome

- OS: Windows 11

- Environment: QA

Key Observations:

- Weak password validation failed (security risk).

- Cart quantity update not functioning properly.

- Expired card payment incorrectly processed.

Conclusion:
The application is **partially stable**, with major issues in cart and payment modules.
Further testing and bug fixes are recommended before production release.
